

DAVID ALLEN CERTIFIED LAUNCHES AOG COVID-19 AIRCRAFT DECONTAMINATION & CLEANING SERVICES

ORLANDO – April 2, 2020

David Allen, founder of The Allen Groupe and David Allen Certified™ launches AOG COVID-19 Aircraft Decontamination and Cleaning Services in response to growing commercial and private aviation industry safety concerns.

“We have been providing COVID-19 aircraft decontamination and cleaning services throughout the United States since the outbreak of this pandemic. Furthermore, we have mobilized our expert staff to also now provide AOG COVID-19 services with a guaranty to reach your aircraft anywhere in the US within 8-24hrs from receiving the “Request for Services” call” states Mr. Allen.

Team members are understanding the risk as they continue to provide essential aviation services across the aviation industry. Leaders are taking many measures to safeguard their employees. With over 30 years of cleaning expertise, choosing David Allen Certified™ for aircraft decontamination and cleaning services can help safeguard your team members.

David Allen Certified™ decontamination processes follow the NBAA Guidelines for disinfection using EPA Registered and Aviation Approved products to clean and disinfect airplanes, facilities and corporate assets to prevent the spread of infectious diseases including COVID- 19.

They will dispatch a Rapid Response team to arrive within 8 to 24 hours to clean and disinfect an aircraft, facility or corporate asset with a known illness to prevent contamination to other crew and team members.

In addition, the Rapid Response apply a secondary Aviation Approved product that provides protection against the spread of the infectious diseases including the Coronavirus for a minimum of a week and in some areas of the aircraft for up to one month.

Timeliness matters to ensure the safety of employees and customers when an aircraft has encountered and/or could encounter a person whom has tested positive with COVID-19. This innovative new AOG Aircraft Decontamination and Cleaning Services with its long-lasting preventive properties is another line of safeguarding defense against the Coronavirus for crew members, aviation services employees and customers.
